PROFESSIONAL SUMMARY

Innovative Problem Solver with **10+** experience in designing, developing, and deploying scalable full-stack solutions. Specialized in cloud services development, system design, and end-to-end product ownership. Proficient in Java/J2EE, Spring Boot, Microservices, React JS, and Azure Cloud. Adept at leading cross-functional teams and delivering high-impact, performance-driven solutions aligned with business goals. Seeking a senior engineering role to leverage expertise in scalability and decision-making.

TECHNICAL SKILLS

Programming Languages: Java, J2EE, Go

Frameworks: Spring Boot, Microservices, Distributed System

Frontend: React JS, Responsive UI Design

Tools: Maven, Jenkins, Git, Docker, Kubernetes, Knative

Databases: Postgress, MongoDB, Ingress, TimeScaleDb

Platforms: Microsoft IoT Hub, Azure Cloud, on-prem (private cloud)

Others: GraphQL, MQTT, Kafka, RabbitMQ, Redis, Keycloak, mTLS, Multithreading, Data Structures, Algorithms, Grafana, Server-less architecture, Apache Flink

PROFESSIONAL EXPERIENCE

Senior Member of Technical Staff | *Sep 2021 - Present*

VMware EUC(Currently named Omnisia) | *Bengaluru*

- Led architectural transition from Microsoft IoT Hub to an MQTT-based messaging solution for monitoring VDIs, eliminating dependency and reducing **infrastructure costs to zero**.
- Designed and implemented a **Keycloak-backed SSO and RBAC solution** to standardize authentication and authorization across enterprise applications.
- Automated edge deployments for **monitoring appliances in an internet-less environment**, streamlining operational efficiency.
- Built integration with VMware's data and analytics platform, sending onboarding and licensing-related metrics for enhanced decision-making.
- Reduced MTTR for virtual desktop issues by 80% using helpdesk, scaling up to **5K RPS globally**.
- Designed and implemented Horizon customer onboarding and licensing workflows.
- Enabled subscription license management, monitoring, brokering, and image management for on-prem, Azure, AWS, GCP, and vSphere customers.
- Implemented hybrid brokering, agent monitoring, agent auto-upgrade and helpdesk.
- Contributed in an AI-assisted ops copilot that ingests Horizon logs to generate remediation runbooks and CLI/PowerCLI snippets in-context, reducing **MTTR by 35%**.

Technologies Used: MQTT, Spring Modulith, Keycloak, Microsoft IoT Hub, Azure OpenAI, OpenTelemetry, PowerCLI, Horizon REST APIs, mTLS, Key Vault

Senior Software Engineer | *Apr 2019 - Jul 2021*

redBus | *Bengaluru*

- Developed a reconciliation system with BITLA, providing bus operators with seamless payment and invoice reporting.
- Built an automated vendor onboarding platform, reducing onboarding time by **90%**.
- Implemented features like **Scratch Card**, Redbus Assurance, and Dynamic Pricing, boosting user engagement.
- Architected chatbot system using **Google Dialogflow** to resolve HR queries instantly, integrated with REST services for real-time employee support.

Technologies Used: Google Dialogflow, REST, Spring boot, Microservices, Go

Technical Consultant | *Apr 2018 - Mar 2019*

Morgan Stanley | *Bengaluru*

- Migrated Admin C++ services to Java for the **FeeBilling system**, enhancing bill generation performance by **40%**.

Technologies Used: Java, C++

Senior Project Engineer | *Jun 2015 - Mar 2018*

Wipro Technologies | *Bengaluru*

- Developed a Gateway bridging customer and streaming server via RTSP protocol in IPTV, enabling customers to seamlessly interact with video content (play, pause, stop, etc.).

Technologies Used: RTSP, IPTV

EDUCATION

B-Tech | *Jun 2015*

Silicon Institute of Technology | *Bhubaneswar, Odisha*

XII | *Apr 2011*

Regional College of Science and Technology | *Nimapara, Odisha*

X | *Apr 2009*

Nimapara High School | *Puri, Odisha*

ACHIEVEMENTS

- Received Circle of Excellence award at VMware for SaaS Product Development
- Rewarded Value Award at redBus for commitment to work
